Progress demo

- Monday 22 September 2025 (08:00 – 17:00).
 - Netlabs.
 - Book your group's slot based on the group's availability (other modules?).
 - Bookings via Google sheet - bookings will open Friday, 19 September 2025.
- 10% of the individual mark.
- Whole group waits together, the marker will come to you.
- Members are marked individually.
- One laptop to be used during the session to demo all group members' work.
- Members are marked individually.
- There is a 5-minute time limit. Please prepare.

Progress Demo

- You are allowed to deviate from your group design!
 - Ensure everyone knows about changes.
- Each group should prepare a status document
 - Google Doc.
 - A page for each member.

Progress demo

- 50% of your tasks are to be completed, and no integration is required.
- All completed code must be demonstrated with **unit tests** to be considered “done”.
- Commenting of completed code is expected. Minimum is function headings.
- 1-page status document describing what is done.
- We expect to see your latest code and that it was on the repo no later than 07:30.

Common Progress Demo Feedback

- Status document table:
 - Rather have more entries that are lower level.
 - Make sure all of your responsibilities are shown (even if not done).
- Testing
 - A test is more than just printing out.
 - It needs to have a condition inside it.
 - Validate that the output is the expected output!
 - GUI Testing in a doc: write what is expected, not just a picture.
 - Validate the response to correct values and incorrect values.

Common Progress Demo Feedback

- GUI:
 - The GUI is more than just images. There is a lot of functionality behind it.
- Back End
 - Easy bits are now done; the harder work starts now.
 - Check if you are doing redundant things that other components already handle.

Common Progress Demo Feedback

- Jira
 - Should have both a backlog and current sprint.
 - Do not wipe sprints once they are completed; we want to see your history.
- Git
 - Lose marks if you committed for only the demo.
 - Last-minute commit, before that, there is nothing <24h.
 - Also looked at <48h.

Demo Retrospective

- Have a retrospective meeting with your team.
 - What went well in the demo?
 - What didn't go so well?
 - It seemed that <x> is behind. How do we assist?
 - Do we need to change our responsibility splits

Progress Demo [24]

Please take a look at the following checklist to ensure that you are ready for your progress demonstration:

- Book a timeslot.
- Complete the status document.
- Invite Tonyv@bbd.co.za, Hermanb@bbd.co.za, u19049910@tuks.co.za and u18291377@tuks.co.za to your Jira projects.
- Push all code that will be demoed to your repo.

For this demo, it is expected that 50% of your tasks are completed, and no integration is required at this stage. Completion requires “done”, which is defined as the code and the unit test for that code is written and passed successfully. Jira and Git will be checked outside the demo slot.

A comprehensive informal test for a GUI would include a document with instructions and screenshots so that a group member could repeat the test and see what the expected result was. A test without such a document/log would be incomprehensive.

Status document [2]

- Completed: 2
- Not fully completed/inaccurate: 1
- Not shown: 0

Jira use [2]

- Your cards on Jira match your progress shown in the demo 100%: 2
- The cards match your demo 75% or more: 1
- The cards match less than 75%: 0

Git use [2]

- Your git usage is regular, and commits are detailed and specific: 2
- Commits are all < between 48h and 24h/not on your own branch: 1
- File(s) are not on the repo/all commits <24h: 0

Comments [2]

- Major functions are described: 2
- Not all functions are described: 1
- None or completely irrelevant comments: 0

Unit tests [6]

- Comprehensive tests with a > 70 % ratio between formal and informal: 6
- Comprehensive tests with a < 70 % ratio between formal and informal: 5
- Incomprehensive tests with a > 70 % ratio between formal and informal: 3
- Unit tests are insufficient: 2
- No unit tests at all: 0

Progress (a task must be “done”) [10]

- 50% or more of your total tasks are completed: 10
- 37% to 49% of your total tasks are completed: 8
- 25% to 36% of your total tasks are completed: 6
- 10% to 24% of your total tasks are completed: 4
- Less than 10% of your total tasks are completed: 0

Distribution of work done against peers [10]

- Equal distribution between peers: 10
- 75% or more of your total tasks against peers: 8
- 50% to 74% of your total tasks against peers: 6
- 25% to 49% of your total tasks against peers: 3
- Less than 25% of your total tasks are completed: 0

Size of Project valid lines of code without comments [6]

- 600 and more lines of code: 6
- 500 – 599 lines of code: 5
- 400 – 499 lines of code: 4
- 300 – 399 lines of code: 3
- 200 – 299 lines of code: 2
- 100 – 199 lines of code: 1
- Less than 100 lines of code: 0
